

Wooldridge Sport Inboard Jet hauls heavy loads, runs shallow, runs deep, and loves recreational watersports.

Sport Inboard Jet: “Versatile!”

The Wooldridge Sport Inboard Jet is the ideal boat for those who tackle shallow rivers, enjoy a jaunt on larger open water, may need to haul a heavy load and like to include water skiing or wake boarding in their on-the-water fun.

Wooldridge incorporated some of the “V” design from their offshore boats in the Sport’s bow (18 degree deadrise) to help break up an open-water chop and combined that with a 12 degree deadrise through the planning surface to enhance the ride.

Wooldridge offers the Sport Inboard in a 20-footer, and it is truly a multi-purpose boat, eager to please in a variety of conditions.

Standard power is the 5.7 liter fuel injected V-8, but the options are many like the Yanmar 6BY-260 turbo diesel. The standard pump is the load hauling Hamilton 212 with turbo impeller. The key is to determine specific needs and sort out the power best for you.

Among the many benefits of the conventional inboard jet power is that marinized automotive-style motor. It’s easy for many folks to understand and service and it offers the benefits of the automotive type heater-defroster system, a comfort and convenience for fishing friends.

It is this power combination as well, that offers ultimate combination of speed, get-up-and-go, load-hauling and recreational

skiing, tubing and wake-boarding.

Wooldridge offers the Sport Inboard jet as an open boat with a console or as a sedan with the large two-piece walk-thru

of deck space for the crew and plenty of hull in the water to get on step quickly, even with a heavy load.

Wooldridge has engineered strength without unnecessary weight into the Sport Inboard Jet with a tough and proven full support structure system.

That means better performance on the water and minimal fuel consumption and less power required to tow it.

Of course this Sport carries the Wooldridge Boats lifetime limited hull warranty for the original owner.

Sport Inboard Jet is right at home on ultra-shallow rivers and maneuvering through rip-rap is second nature to the multi-purpose 20-footer. Large two-piece, walk-thru windshield offers great visibility sitting and standing and easy access to the beach.

windshield. The windshield model feature a recessed self- draining bow and forward walk-around with wing. That two-piece design presents optimum visibility at the helm, sitting and standing and makes it easy to load large coolers, people, gear and game...be it from the beach or river bank.

There are many other features that serious boaters and anglers will appreciate. The full length welded side trays, for example. Check out the stand-up gunnel with toe Rick for stable, comfortable fishing all day long. The Sport’s beamy 6’ wide bottom means lots

SPECIFICATIONS	20' SPORT IB
Length	20' 3"
Beam	94"
Side Height	28"
Side Gauge	1/8
Bottom Width	72"
Bottom Gauge	3/16"
Weight (open)	2,555 lbs.
Weight (windshield)	2,630 lbs.
