

Alaskan XL 18' & 20' Models

Alaskan XL shown with options*

Shallow water running without compromise.

Meet the new Wooldridge Alaskan XL! A bold upgrade for boaters who demand next-level handling, serious load-hauling power, and outstanding fuel efficiency from an outboard jet boat. Engineered as the bigger, tougher sibling of the Alaskan, the XL offers a wider planing surface, taller sides, and a larger windshield, making it the most capable boat in the Alaskan lineup.

Choose from windshield or open-boat layouts, with console, tiller, or Aft Helm steering to match your style. Beneath it all, a formed ribbed hull and exclusive Wooldridge jet tunnel deliver exceptional shallow-water performance, sharper maneuverability, and added protection for the jet foot, so you can go where others can't.

Built tough without unnecessary weight, the Alaskan XL features a combination of reinforced chines and .160" bottom for impact resistance, supported by a structural system that balances strength with efficiency. Its ultra-wide 80" hull provides rock-solid stability and aggressive handling, while rugged styling and a Limited Lifetime Hull Warranty complete the package.

The Alaskan XL isn't just bigger, it's built to go farther, carry more, and handle the toughest waters with confidence. Whether you're pushing limits or exploring shallow rivers, this boat delivers the power, stability, and versatility you need to run harder and go further than ever before.

Wooldridge Boats exclusive jet tunnel offers the best in shallow water running and handling in challenging river running conditions. The tunnel allows the jet foot to be raised for protection, a clean water feed and ram effect. It also provides traction for controlled and predictable performance in tight quarters.
