

Sport 18' & 20' Models

20' Sport Windshield

Run the shallows, tame the chop.

The Wooldridge Sport is a jet boat designed for those indecisive folks who can't decide which is more important, whether to navigate up shallow tributaries where most can't (or won't) go or choose to chase their favorite fish into deeper waters. Want to take the family for a casual cruise on the lake? The Wooldridge Sport with its 18° deadrise in the bow has you covered! The Sport features our legendary Wooldridge jet tunnel that's integrated into a well-balanced 10° deadrise at the transom/planing surface, so whether setting up for a curvy side channel or running over that shallow riffle, the Sport is well prepared. Offered in 18 and 20 foot lengths, choose the style best suited to your boating! Open model with choice of tiller or console, or opt for the windshield model with its large two-piece walk-through windshield for optimal function, visibility and ease of access to the beach or river bank. There's plenty of room to load large coolers, people, gear, and game. The stand-up gunnel with toe kick assures stable, comfortable fishing all day long. And, the Sport's beamy 72" wide bottom means lots of deck space for the crew. Updated in 2023, the Sport also features higher 32" sides with sleek modern flat gunnels. Standard diamond-plate floors and a newly designed dash rounds out the attractive new features! Easy to tow and easy to launch, Wooldridge has engineered strength without unnecessary weight into the Sport. Refined through four generations of superior boat building, rest assured that all Wooldridge boats come with a Limited Lifetime Hull Warranty for the original owner. The Wooldridge Sport is a versatile boat, built to last and loaded with features to meet the full gamut of outdoor challenges and opportunities. Check out the new Wooldridge Sport model today!

Wooldridge Boats exclusive jet tunnel offers the best in shallow water running and handling in challenging river running conditions. The tunnel allows the jet foot to be raised for protection, a clean water feed and ram effect. It also provides traction for controlled and predictable performance in tight quarters.
