

Super Sport Drifter Model

Run harder than ever before!

The Super Sport Drifter is a big, beamy boat, with a 84" bottom that puts lots of hull in the water for hauling a heavy load and getting on step in a heartbeat. The wide bottom adds great stability while fishing and the exclusive Wooldridge jet tunnel assures running in super shallow water. It's offered as a sedan or open boat (tiller and console); boaters can select a design and options sure to meet their on-the-water needs. Wooldridge engineered great strength with minimum weight into the Super Sport Drifter for great performance on the water and on the highway with modest power and minimal fuel consumption. And, about that exclusive Wooldridge jet tunnel, it acts as a skeg, enhancing traction on turns. The tunnel also helps flow clean water to the jet, for maximum driving force. The Wooldridge tunnel moves the jet foot up out of harm's way for less exposure to shallow water rocks. The windshield model has a recessed, self-draining bow and forward walk-around with wing for wave deflection. Check out the broad two-piece, walk-through window. Visibility is great from the helm, either standing or sitting. Full-length welded side trays and a handy full-width transom shelf provide convenient access to tackle and rods. The roomy toe kick assures stable, comfortable fishing all day. The built-in, under-floor, 50-gallon fuel tank gives excellent range. Plenty of storage where it should be, gear stows conveniently under the floor and in the bow. Get ready for all-weather fishing with your buddies or recreational boating with the family. There's plenty of elbow room for everyone and it all means more fun and success on the water.

Many options available

*All boats pictured contain optional equipment

Wooldridge Boats exclusive jet tunnel offers the best in shallow water running and handling in challenging river running conditions. The tunnel allows the jet foot to be raised for protection, a clean water feed and ram effect. It also provides traction for controlled and predictable performance in tight quarters.
