

ALASKAN LT 16', 18' & 20' Models

20' Alaskan LT shown with options

Run shallow, run far. Alaskan LT will get you there.

For years, our customers asked us why we don't build a lighter duty entry level jet boat like many of the other stackable model boats out there.

You know, one of those boats the "other guys" sold to big box stores and dealers everywhere. Well fact is, we've really prided ourselves on ultra-high quality handmade welded boats that are truly made one at a time, not mega dealer production style crafts like you see everywhere else.

Such a boat would imperatively have to carry on the 100 plus year family owned legacy of quality that we could proudly put our Wooldridge name on. Well friends, the wait is over. Introducing the perfect ultimate light model jet boat, tailor-made for running skinny shallow Alaskan rivers or chasing waterfowl thru rain-swollen valleys and bogs during a wet fall day. Lengths of 16', 18' and 20' will feature a 5' bottom and of course as you would expect, our often imitated but never duplicated jet tunnel. Offered in tiller, center console and our traditional 2-piece windshield models (WS for 18' & 20' only). For those who want that smaller jet hull, without sacrificing solid welded structural integrity, your search ends here.

Check out the new Wooldridge Alaskan LT model!

BOAT SPECIFICATIONS

Wooldridge Boats exclusive jet tunnel offers the best in shallow water running and handling in challenging river running conditions. The tunnel allows the jet foot to be raised for protection, a clean water feed and ram effect. It also provides traction for controlled and predictable performance in tight quarters.
