

# CANYON BROCHURE

The Wooldridge Canyon's broad bow design is ideal for tackling those turbulent white water runs and brawling rapids. It provides vital lift and excellent control in fast moving water. Wooldridge builds the Canyon with an intensive support structure system for ultimate durability and longevity in the harshest of conditions. These characteristics make it a favorite among those who venture well off the beaten track. The Canyon is available in Lengths of 21', 23', 25' and 27' (Custom dimensions upon request) with a standard configured walk through windshield or open center console concept. The standard large walk-thru windshield design allows easy access and maximum visibility from the helm. The Canyon can be loaded with many optional choices including enclosed cabin, Idaho deck and even stick steer to accommodate specific on-the-water needs of our customers. Of course, our popular "fishing machine" option is also available on 23' boats and larger without cabin. This moves the engine forward 2' with full walk-around access giving an open path in the entire transom area. The deck around the engine is raised to cover the extended drive line. Included with the "fishing machine" option are two under floor 50 gallon saddle fuel tanks which increases range for extra-long hunting or fishing excursions. Full length welded side trays with marine carpet offers convenient access to rods and tackle. Stand-up gunnels with toe kick assures stable comfortable fishing all day. And a transom sink/fish box with large cutting board provides stowable space for packing the days catch away. This Wooldridge model is available with the full range of gas and diesels engines to suit boater needs. The standard pump is the Hamilton 212 with turbo impeller. Of course, the Wooldridge Canyon carries a lifetime limited hull warranty to the original buyer. Call Wooldridge Boats or your local dealer for additional information and questions.

## BOAT SPECIFICATIONS
