

## Skagit 18' & 20' Models

20' Skagit shown with agency options

## Rugged and agile, who says you can't have it all?

The new Wooldridge Skagit model is the latest evolution of quintessential Wooldridge design with its tough looking rugged squared bow, classic wooldridge lines and relentless durability! The name alone conjures up images of true Pacific Northwest tradition and might. A perfectly fitting description for this robustly engineered hull with four generations of boat building experience! Don't allow this tough guy on the block to intimidate you however, as this Woolly jet boat features the exclusive Wooldridge jet tunnel which enhances agility, and corners on a dime! Let's not forget our unique tunnel design allows for the shallowest running outboard jet boats on the market! What's more is the overly done super-structure designed to combine tight fit cross beams, and gusseting with its heavier duty bottom that makes this boat as rigid as a tank! A wide 6' bottom for balance, tracking, planning and straight up load hauling and you have an incredibly versatile machine that a wide audience from government agencies to hunters and fisherman are sure to appreciate! The new Wooldridge Skagit model is offered with inboard or outboard power in 18' and 20' lengths. Go online or call today to check them out!

Wooldridge Boats exclusive jet tunnel offers the best in shallow water running and handling in challenging river running conditions. The tunnel allows the jet foot to be raised for protection, a clean water feed and ram effect. It also provides traction for controlled and predictable performance in tight quarters.
